

Small actions, big changes: Helping the Environment at School

1. First, try to use less plastic every day

2. Next, carry a reusable water bottle instead of a plastic one.

3. Then, also bring food containers from home and take them back to wash and reuse them

4. After that, always reuse the paper for notes or drawings before throwing it away

5. Wash plastic bottles or food containers before throwing them away

6. Later, pick up any trash you see as you walk around the school and put it in the bin.

7. Also, encourage your friends to use reusable items like bottles, bag, and containers

8. Finally, join or create an eco-club to help with school projects about the environment
